

CAM Turning Training

Turning is the core turning class designed to convey concepts, functionality, and application of the turning module.

Who should attend?

This course is aimed at design engineers looking to use Solid Edge Simulation, or those who are currently using it and want to improve their knowledge.

Duration

Course type: Classroom

Duration: 3 days

Skills level: Novice to Intermediate

Training Topics

- Introduction to finite element analysis (FEA)
- FEA processes
- Geometry
- Meshing
- Properties
- Loads and boundary conditions
- Connectors
- Linear Static Analysis
- Normal Modes Analysis
- Linear Buckling Analysis
- Heat transfer Analysis
